

Stop Smoking Aid

Quit Tea

www.quittea.com • 323-902-5033

Quit Tea is a natural stop smoking aid that helps alleviate a wide range of the problems associated with quitting smoking. The herbs and spices in Quit Tea help by reducing the anxiety and stress common with nicotine withdrawal, they suppress appetite to reduce post quitting weight gain, detoxify the body, and improve lung function. Most importantly Quit Tea helps break the psychological addiction to cigarettes by replacing the habit of smoking with one that is healthy; the key to long term quitting success. Quit Tea has shown to

be effective, and is recommended by professionals.

Quit Tea is used by smoking cessation counselors, chiropractors, acupuncturists, respiratory therapists, and more, all across the United States and Canada, to supplement their smoking cessation therapy. Quit Tea works with cold laser therapy, acupuncture, hypnosis, behavioral modification, and other treatment options, to increase success in-between in-office sessions.

In an informal trial of 65 smokers over a nine week period, Quit Tea was successful in helping 17 percent of participants to quit smoking -- comparably high for long term rates. It also received a high common response: 59 percent said drinking Quit Tea made them feel "relaxed," and 65 percent thought Quit Tea was either "effective" or "very effective" as a smoking cessation aid.
